

Greeting

In 2020, our company will celebrate the 25th Anniversary.

I and my wife had started the business from the one room at our home, and now we can celebrate the 25th anniversary because of strong support from local friends, employees and customers. We really appreciate your kind supports.

Miyakonojo city in Miyazaki is famous for livestock and agriculture with rich in water and surrounded by greens. Among this blessed environment we engaged in sales of Feed, Fertilise, agricultural chemicals and picking up of rices for staple foods and rices for processing foods in this local community. Currently, we set up our direct own form with the experience from the consignment sales of young pork pig and escrow farm, and we aim to further development.

Moreover, now we have started the self production and picking up of feed rice, we use it as the main materials for the compound feed for the pigs at our firm.

We are now engaged in seedling and whole process of feed production, we can contribute to decreasing the number of fields with abandonment of cultivation then improve our food self-sufficiency and environmental safety in our city.

Representative Director, President
Moriharu Kuroki

We are full of appreciation!

MK Shoji Limited Company

Our company's Approach!

01 Distribution of Rice

Business Outline

Aim to producing the stable rice cultivation, we harvest the super early rice and rices for staple food at the normal harvest season in fall. Then we also collect processing rices. Our staff who have been certified as the inspector for agricultural products by Ministry of Agricultural, Forestry and Fisheries (MAFF). The Brown Rice from local farmer after the strict inspection by our employee are distributed to Consumers.

An Integrated System

Commitment to the Quality

To become the Advanced Agriculture

Start from 2012, We set up the integrated production system which starts from the seedling, harvesting, collecting and inspection.

Have a strict inspection for all of collected rice. We store the feed rice at refrigerated warehouse of our related company and keep them in safety and reliable condition and deliver it to feed mill periodically.

MK Shoji introduced the latest machinery to improve the work style. And we keep challenging to the new agriculture, advanced agriculture.

02 How to produce the "Rice Pork"

Production process

『Rice Pork from MK Shoji』 eat Japanese feed rice which is harvested in South Kyushu, mainly at Miyakonojo-City in Miyazaki Prefecture. Our Company is also engaged in the seedling of the feed rice to harvesting all by ourselves. Moreover we provide our seedling to the reliable farmer who works with us under the rice distribution business in past many years, and seek them to producing the rice with our seedling. This Japanese feed rice is managed under an integrated system from collecting, inspection, storage, delivering to the manufacture of compound feed, manufacturing and feeding to the pork pig at our direct managing farm. Currently most of the raw materials of compound feed are contributed by imported materials, however we can manufacture the unique feed including 20% of domestic feed rice.

STEP. 1

Production of Seedling and feed rice

We have started the production of feed rice by our selves since 2014, and further involved to the production and sales of seedling since 2015. We are managing an integrated flow from rice-plant to the harvest at our own field.

STEP. 3

Transportation & Inspection

Three of our inspector for agriculture products conduct the inspection.

STEP. 2

Adjustment & Drying

Drying and Rubbing by own dryer for self produced rice.

STEP. 4

Storage

K plus Co Ltd which is entrusted by us manage the storage at refrigerated warehouse, we try to unified to manage the balance of stock and its quality.

STEP. 5

Grinding & Compounding

We entrust to the feed manufacturing company to process to the pellet.

STEP. 6

Deliver to MK Shoji Farm

Feed the feed rice at each farm. Pork Pig have been brought up as 『MK's Rice Pig』

03 Introduction of Direct owned Farms

Our Company owns two direct farms in Miyazaki Prefecture and another two direct farms in Kagoshima Prefecture. Both bleeding and fattening are available at our farm. Our pork pig eat feed rice which is produced by contracted farmer and our own farms, it is famous as "MK Shoji's Rice Pig" at super market not only in Kyushu Area but also Kanto and Kansai Area.

Sueyoshi Farm (Bleeding Farm)

Osaki Farm (Fattening Farm)

Sakiyama Farm (Fattening Farm)

Fuemizu Farm (Fattening Farm)
